Reasons For Allowance

1. The following is an examiner's statement of reasons for allowance: Nugroho (U.S. Patent No. 6,321,323) teaches a system and method for executing platform-independent code using a co-processor (column 1, line 66 through column 2, line 2). However, Nugroho differs from the claimed invention in that the system and method of Nugroho does not perform a call routing service in an intelligent network. Britt (U.S. Patent No. 6,327,355) teaches the use of platform-independent code for supporting services in an intelligent network (column 2, lines 21-41). However, Britt fails to teach a platform-independent communication system to enable routing call information between a calling party and a destination party via an originating and terminating line object instances independent of their location in the network. Therefore, prior art of record fails to teach a method for performing a call routing service in the intelligent network having one or more service nodes and a switch platform including an originating switch for receiving communications service requests from a calling party as detailed and directly claimed in all independent claims.

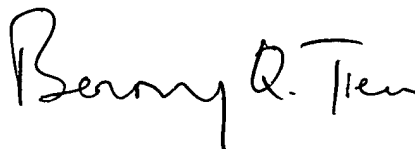

2. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
